

SOCIAL DISTANCING SOLUTIONS

You can preserve your clear plastic stocks by using it in conjunction with ALUPANEL[®] Aluminium Composite to create efficient, and durable social distancing measures with visibility where it's needed

ALUPANEL[®] can be used with a profile system for even more versatility

For simple counter-top designs ALUPANEL[®] can be printed direct and combined with a clear visibility panel to provide a simple but effective solution, using either all flat components or v-grooving ALUPANEL[®] to make a one-piece, prefabricated surround

Are you using clear plastic materials for social distancing products?

As a result of the significant increase in demand for clear plastic panels, lead times are increasing every day. However, alternative designs that combine clear plastic with the versatility of ALUPANEL[®] can help you to satisfy orders and increase your unit output and the range of solutions you provide by using the same volume of clear plastic but in partnership with eco-friendly Aluminium Composite, a material that's infinitely recyclable.
